

0-10V to DALI Converter

Datasheet Interface

Module for the control of a DALI-
line with analogue 0-10V signals

- Art. Nr. 86468353-1-HS (1 channel)
- Art. Nr. 86468353-2-HS (2 channels)
- Art. Nr. 86468353-3-HS (3 channels)

0-10V to DALI Converter Interface

Overview

- Small interface module for the conversion of 0-10V control signals to DALI dim levels
- Devices with 1, 2 and 3 channels available
- The 0-10V voltage is transformed to a DALI dim level and DALI-command Off and sent to the defined effective range on the DALI line
- A change on the 0-10V input voltage (<1%) is used as event trigger
- Supply voltage 12V to 24V DC
- Configuration of effective range and conversion characteristic (conversion curve and behaviour below 1V input voltage) via DALI-Cockpit and DALI-USB-interface
- Passive input: the module does not supply any voltage to the input, suitable for control with a 0-10V analogue signal (e.g. Siemens LOGO)
- External DALI power supply (e.g. DALI PS) required
- **Galvanic isolation between DALI-Bus and 0-10V input respectively 24V-supply voltage**

Specification, Characteristics

Type	0-10V to DALI Converter		
article number	86468353-1-HS	86468353-2-HS	86468353-3-HS

Elektrical data:			
supply	12V-24V DC		
typ. input current 24V	5mA		
input	1x 0-10V / 0,1mA	2x 0-10V / 0,1mA	3x 0-10V / 0,1mA
output	DALI		
Function	converter, function configurable via DALI		

Technical data:	
temperature	-20°C ...60°C
geometry	1TE, 98mm x 56mm x 18mm
mounting	Din rail
protection class	IP20
connecting wire cross section	up to 2.5 mm ²

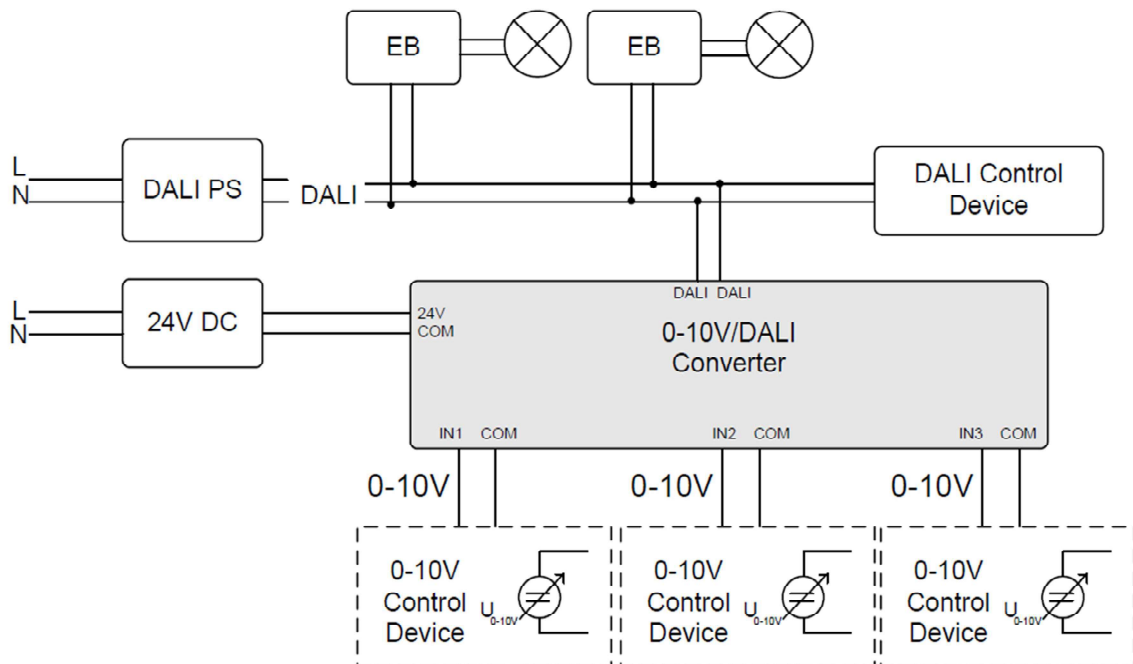

geometry

connection plan
1 channel

connection plan
2 channel

connection plan
3 channel

typical installation 3channel 0-10V to DALI converter

0-10V / DALI conversion

Light level of a DALI-ballast connected to the converter (corresponding to IEC62386-102).

conversion characteristic:

The input voltage in the range of 1V-10V is converted into DALI dim levels.

In the DALI-Cockpit the following parameters can be changed:

Light Level Range:

0.1%-100%, 1%-100% or 10%-100%

On/Off-Behaviour:

the behaviour below 1V input voltage:
DALI-command OFF or RECALL MIN

On the left the characteristic with 10%-100% dimming range is shown as an example.

Purchase Order Information

Art. Nr.: 86468353-1-HS: 1 channel 0-10V to DALI Konverter, conversion of a 0-10V analog voltage to a DALI dim level, input passive, 24V DC supply, input and supply electrically isolated to DALI-line, suitable for external DALI power supply, din rail

Art. Nr.: 86468353-2-HS: 2 channel 0-10V to DALI Konverter, conversion of a 0-10V analog voltage to a DALI dim level, input passive, 24V DC supply, input and supply electrically isolated to DALI-line, suitable for external DALI power supply, din rail

Art. Nr.: 86468353-3-HS: 3 channel 0-10V to DALI Konverter, conversion of a 0-10V analog voltage to a DALI dim level, input passive, 24V DC supply, input and supply electrically isolated to DALI-line, suitable for external DALI power supply, din rail
