

Petrol Station & Shop

Boost sales at your gas station

Your advantages of light optimization

Light makes so much difference, you will be surprised

Friendly image for more sales

Make your customers feel comfortable and safe. This is proven to increase the sales of your job store

Save costs with LED conversion

Efficient and long-lasting LED technology will significantly reduce your lighting costs - save up to 90% on energy costs

Standard-compliant light: we handle it

Regulations regarding gas station lighting are opaque and annoying. Convert today and stay stress-free in the long term

Low maintenance: simply reliable

With high-quality LED lighting, you save yourself the hassle of replacing and maintaining your lights. This means more time for the important things

These specifications apply to service stations

Be the highlight

Unmissable, far into the street

The entrances and exits of your service station should be illuminated with at least 50 lux, so that a safe approach to your business is guaranteed.

✓ 50 Lux for driveways

Create orientation

Readability at fueling and testing stations

To make it easier for your customers to read gas pumps and test stations, an illuminance of at least 150 lux is recommended.

✓ 150 Lux ✓ glare-free

Endangered operating sites

Explosion proof illumination

According to the publication VdS 2033, gas stations are considered to be operating sites at risk of fire. Therefore, it makes sense to equip the hazardous area with EX luminaires.

✓ EX-Protection ✓ ATEX

Increase sales

In the store: Using ambience to increase dwell time

The feel-good factor of your customers should be particularly important to you - so they like to stay a little longer at your gas station.

✓ CRI >80
